Bemerkung Achsnig Rico verlässt das Spiel um 17:30 Uhr

the 1990s, the number of people in the world who are living in poverty has increased from 1.2 billion to 1.6 billion (World Bank 2000).

There are a number of reasons for this increase in poverty. One of the main reasons is the rapid growth of the world population. The world population is expected to reach 8 billion by the year 2025 (United Nations 2000). This increase in population has led to a corresponding increase in the number of people who are living in poverty.

Another reason for the increase in poverty is the rapid growth of the world economy. The world economy has grown rapidly since the 1980s, but this growth has not been evenly distributed. The rich countries have grown much faster than the poor countries, and this has led to a widening gap between the rich and the poor.

A third reason for the increase in poverty is the rapid growth of the world's debt. The world's debt has increased rapidly since the 1980s, and this has led to a corresponding increase in the number of people who are living in poverty. The poor countries are unable to service their debt, and this has led to a corresponding increase in the number of people who are living in poverty.

There are a number of ways in which the world can reduce the number of people who are living in poverty. One of the main ways is to reduce the world's population. This can be done by increasing the age at which people have children, and by increasing the number of children who die before the age of five.

Another way to reduce the number of people who are living in poverty is to reduce the world's debt. This can be done by increasing the number of people who are employed, and by increasing the number of people who are paying taxes.

A third way to reduce the number of people who are living in poverty is to increase the world's economic growth. This can be done by increasing the number of people who are employed, and by increasing the number of people who are paying taxes.

There are a number of other ways in which the world can reduce the number of people who are living in poverty. These include increasing the number of people who are employed, and increasing the number of people who are paying taxes.

The world has a long way to go if it is to reduce the number of people who are living in poverty. It is essential that the world's leaders work together to find ways to reduce the number of people who are living in poverty.

There are a number of ways in which the world can reduce the number of people who are living in poverty. These include increasing the number of people who are employed, and increasing the number of people who are paying taxes.
